

say **YES** to **YES EMR...**

## **YES Medical System**

As your needs change, we ensure your system is changing with you. Our team of experts ensures that all parts of your medical workflow are integrated seamlessly. The company was accredited with the ISO 13485:2003 standard in April 2011. Physicians and medical staff are the driving force behind the development of our software.

### **Murray Pearce, M.D., F.R.C.P.**

*...the customization to the encounter page, the subsequently generated consultation letter and the incorporation of all of the various requisition forms (blood work, X-ray, CT, MRI, nuclear medicine, cardiognostics, etc.) and the prescription module make for a truly paperless office. All of this has been accomplished with the timely and focused assistance from the personable YES staff.*

### **Wadid Abadir, M.D.**

*As wonderful as the EMR system is, what I really appreciate is the customer support which is prompt, knowledgeable, efficient and friendly. They bend over backwards to make sure that my EMR needs are well looked after. I do not hesitate to recommend this product to any specialist or family doctor.*

YES Medical System solutions meet the need for a wide range of medical offices including Cardiology, Dermatology, Family Medicine, Gastroenterology, Geriatrics, Immunology, Internal Medicine, Ophthalmology, Orthopedics, Pain Management, Pediatrics, Rheumatology and more.

and Medical Software Solutions**

# YES Billing & Scheduling

## Efficiency

Reduced keystrokes or clicks make entries quick and easy. With the use of the YES Quick Bill feature, create a list of the most commonly used services individually or grouped and simply click on your selection.

For those that bill the same service for a list of patients, such as nursing homes, or diagnostic testing, the YES Medical Billing and Scheduling program allows you to create a list where all patients are billed with the same service code. Bill a day's worth of patients in seconds!

## Simplicity

Reconciliation is just as efficient. When downloading and processing the RA or Claims Error Reports, the program allows you to print or view the claims on your screen.

YES Scheduling comes with a colour coded electronic scheduler. You can view the day, week or month quickly and easily. View the day, and you will see real-time status of the patients; identifying their status such as Waiting, No Show, Cancelled, or Completed. At the end of the day, use your scheduler to create a list for Billing.

# YES Electronic Medical Records

## EMR solutions customized for you!

Choosing the EMR tailored for your needs can be a challenging decision. YES Medical System makes this decision easy for you with a wide-range of solutions for medical offices.

Technology can only move forward if we bring everyone along. YES Medical System makes it easy to incorporate revolutionary handwriting and voice dictation technology to help you step into the EMR world. Attach scanned legacy documents to new documents moving forward, to see patient files as one.

## Generate patient records in seconds with our easy to use, customizable software.

- Integrated browser-based software (you control and house your own server, not in the cloud).
- Electronic inking and handwrite options.
- Use Remote Access, VPN or other secure connections.
- Unique layouts allow you customize menus for each user.
- Voice dictation directly in the EMR, for easier note taking.
- View cumulative Lab results as a graph or table
- Common tasks accessible using one-click action items.
- User-defined customizable templates allow users to design their own templates and import directly into the EMR.
- Fully integrated with Electronic Document Management.
- Task management system to notify users of high priority tasks.
- User defined ways to configure user and group security access to the system.
- Store images, video, audio, drawings, photo, PDF, DOC or ANY file natively inside the YES database.
- A substantial cost saving to your practice.

**YES EMR gives physicians and their staff the ability to store patient demographics, billing, scheduling, encounter notes, and related medical record data, as well as archiving paper documents, or import electronic files for reviewing purposes.**
